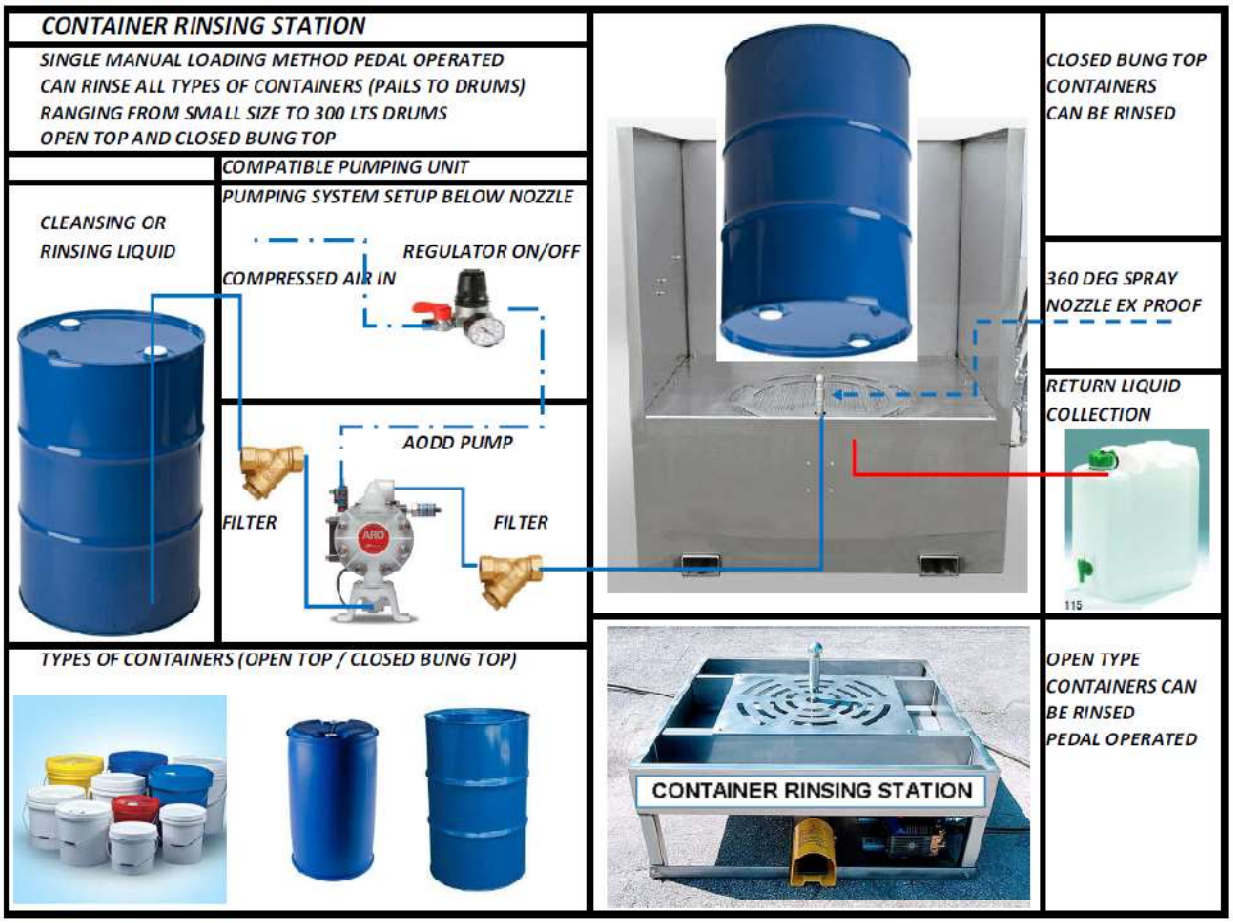
PLAN B ENGINEERING SOLUTIONS

DRUM RINSING SOLUTION

Our Solution rinses / cleans any open drums / containers on the inside by using solvent or compatible cleaning liquids. Effective rinsing operation is done by 360 degrees rotary spray nozzles spraying the liquid at pressure to remove the residual material. The System can be easily configured to your existing production lines.



Features

- Modular Design for Operator Process Safety
- Stainless Steel Construction
- High Pressure 360 degrees rotary wash nozzle
- Quick Rinsing Cycle with Solvents and other liquids
- Powerless Pneumatic Controlled System
- Suitable for Atex Applications
- Compact and Cost Efficient
